## Allergen Statement

Raining Rose is dedicated to producing the highest quality products for our partners. To accomplish this, we strive to ensure our formulas pass all quality standards and claims requested.

In accordance with labeling regulations by the Food and Drug Administration (FDA), cosmetics and OTC drugs are not required to have allergens declared on labels. As a company policy, all ingredients will be provided to customers for review of known concerns with allergens.

Products manufactured at our facility may be in contact with allergen-containing materials. Under our Allergen Control Management plan, we adhere to Good Manufacturing Practices (GMPs), Sanitation Standard Operating Procedures (SSOPs), and training to prohibit cross-contamination across products.

The goal of our allergen program is to identify the food allergens in our facility as recognized by the FDA and ensure derivatives are handled correctly.

In the limited incidences when a specific claim is on a product, each lot of the product is tested to verify labeling.
